EASY SCHEDULING FOR GROWTH-ORIENTED TEAMS
**Calendars**
Two-Way Calendar Sync
Connect your team's calendars to Zoho Bookings. Avoid double-booking and increase efficiency. See your schedule for the day, week, and month on our calendar dashboard.

Team Scheduling

Share pooled availability with customers on the booking page. Allow customers to choose a staff member or opt for using our routing algorithms to allocate appointments.
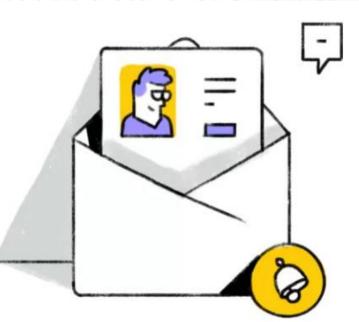

Update Your CRM

Keep track of your appointments and plan for follow-up from your CRM. Use our built-in integration with Zoho CRM or connect to another CRM with Zapier or Zoho Flow.

Notifications And Reminders

Send emails and SMSes to confirm and remind about appointments. Personalize emails with the customer name, the sender address, and the online meeting link.

Booking Page

Choose from three types of booking pages: staff, service and workspace. Select a template that resonates with your brand. Embed the booking page on your website or map it to your domain.

Online Payment

Collect payments ahead of your appointment and minimize losses due to no-shows. Avoid awkward payment follow-ups. You can collect a deposit or partial payment, too.
