# SIMPLIFY DATA COLLECTION WITH ONLINE FORMS

Create forms, share them online, receive instant alerts, and efficiently manage your data with our integrated apps. Focus on your business while Zoho Forms handles the data collection process for you!

## CREATE

### Create Visually Appealing Online Forms Without Having To Code

Our feature-rich form builder with 30+ field types, customizable themes, situation-specific templates, and a simple user interface, helps you create beautiful, functional forms for all your needs

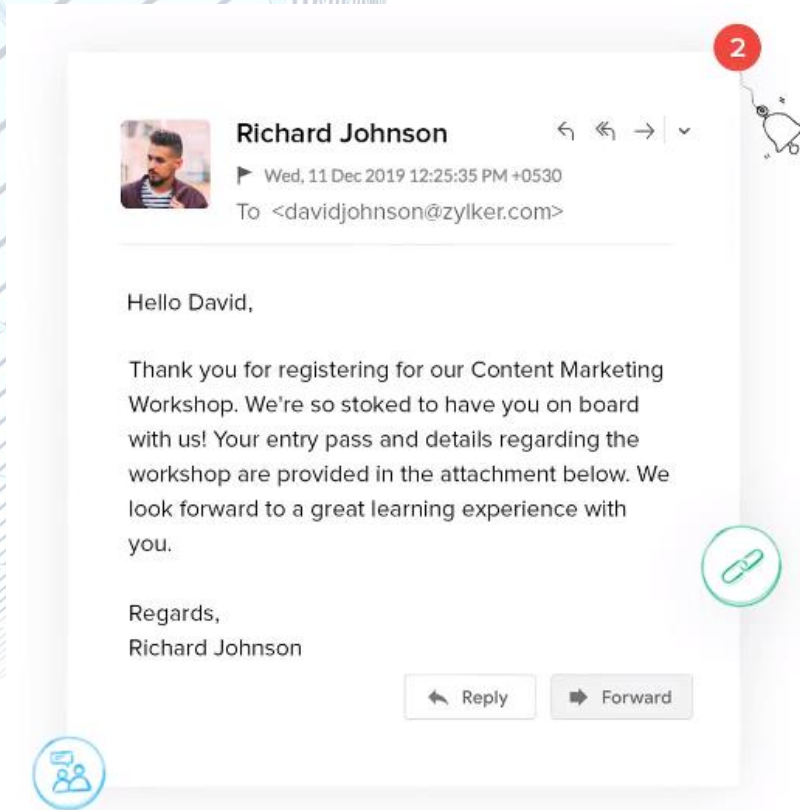

The image shows the Zoho Forms builder interface. On the left is a 'Basic Fields' panel with a grid of field types: Single Line, Checkbox, Multi Line, Dropdown, Name, Radio, Payment, Formula, Section, Page Break, Subform, and Currency. Below the panel are icons for adding images and a color palette. On the right is a live preview of a form titled 'Workshop Registration'. The form includes fields for Name (First and Last), Email (with the example 'richardjohnson@zylker.com'), and a Registration Fee section with radio buttons for 'PayPal' and 'stripe', and a text input showing '23.00' with a dollar sign. A 'Submit' button is at the bottom.

## SHARE

### Collect Data From All Corners

Embed forms on web pages and engage with your website visitors. Share links on social media or with a target audience through email campaigns. Let your forms reach a wider audience or keep them private within a closed organization.

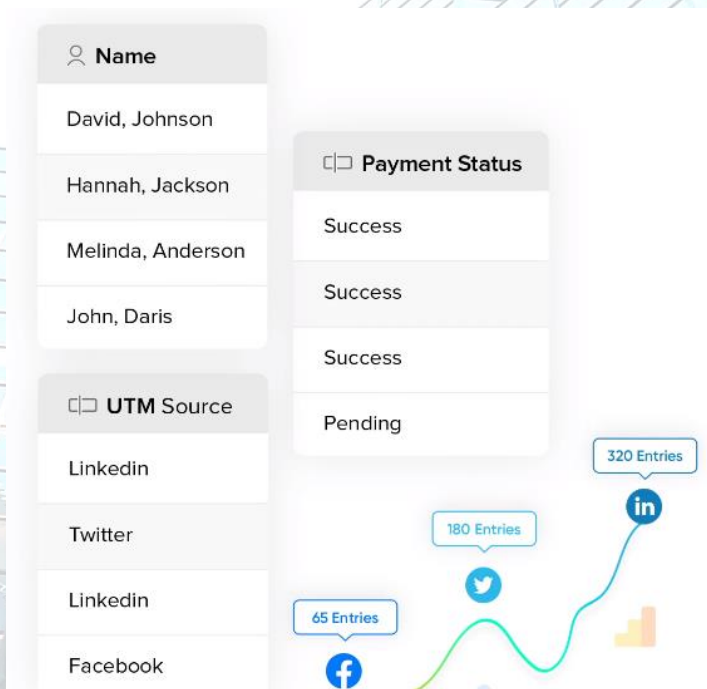

The image shows the 'Embed Options' panel on the left, which includes 'iframe Source', 'JavaScript Code', and 'Popup Dialog' options, along with a green code icon. In the center is a preview of the 'Workshop Registration' form, showing the same fields as in the previous image. To the right of the form preview is a social media sharing bar with icons for Facebook, Twitter, LinkedIn, Messenger, and Email. At the bottom of the form preview, the source code is shown as 'src="https://forms.zohopublic.com/' followed by a QR code.

## NOTIFY

### Stay Informed With Instant Notifications

Trigger conditional email or SMS notifications from your online form whenever a new record is submitted or updated. Include attachments and keep all concerned parties in the loop. Receive instant updates on chat platforms where your teams can work collaboratively.

## ANALYZE

### View, Analyze, And Optimize Data

Sort and view form entries, export them as spreadsheets, or send the data to apps you use. With UTM tracking and form analytics, measure and optimize your form's performance for better conversions.

## Let Data Flow To Your Daily Apps With Form Integrations

With our seamless integrations, Zoho Forms is a reliable front-end data collection system that works with various applications to fuel all kinds of businesses.
