# THE ULTIMATE STAFFING EXPERIENCE TO GROW YOUR BUSINESS

Zoho Workerly is an end-to-end temp lifecycle management software for staffing agencies. With our unified platform, schedule temps, manage e-timesheets, generate invoices, and close jobs faster.

## Say Goodbye To Manual Searches

Zoho Workerly's AI-powered search automatically matches a list of temps to a job based on given criteria, saving you the time normally spent on finding candidates for your client. You can then place temps faster by communicating better with both the candidates and clients through effective communication.

## Assign Workers

Schedule or reschedule jobs quickly by creating a list of matching temps using Criteria Search.

## Send Invoices To Clients

Record the number of hours your temp has put in on a project and then send your client an invoice for approval.

## Job Requisition From Client

Assess the scope of your client's job to assign the right temps with the right skills. Everything else will fall into place.

## Track Timesheets

Automatically calculate work hours put in by your temp workers at your client's location.

## Why Zoho Workerly

Empower your temporary workforce and build a large network of countless happy clients.

## Happy Temps For The Long-Term

Empower your temps by getting consent from them upon assigning jobs. Temps can accept or reject the job in their temp portal or via a link shared over email or SMS.

## Paperless Timesheet Management

Build daily, weekly, or monthly timesheets as you need them. Eliminate manual record maintenance by switching to e-timesheets. Maintain an organized database of all your temps while automatically calculating and tracking their work hours at your client locations.
