WEBINAR SOFTWARE TO TRAIN AND ENGAGE LARGE AUDIENCES

Influence, educate, and engage your global audience by conducting free online webinars. Use Zoho's free webinar software to conduct online webinars, virtual classes, employee onboarding, and market your products and services in just a jiffy.

How can industries benefit from our free webinar software?

Organize

Present

Engage

Analyze & follow up

Organize Webinars

Create webinars using the industry's best webinar software.

Organize

Host webinars regularly to keep your audience engaged. Schedule a webinar once and set it to repeat on the schedule you choose using recurring webinars. Deliver presentations to your audience and engage them through screen sharing and video conferencing using the best webinar tools.

Add Co-Organizers

Add your colleagues or guest speakers to your webinar as co-organizers. Co-organizers can co-host presentations, answer questions, launch polls, record webinars, and enable attendees to speak during the webinar.

Customize Registration Forms

Add your company name and logo on your registration form to promote your brand. Insert custom fields and questions in your registration form to gather the information you need from your attendees.

Email Customization

Customize the content and design of your webinar invitations, registration confirmations, and follow-up emails. Use Email customization to easily send reminder emails before your webinars to boost attendance.

Embed Registration Forms

Promote your webinar by publicizing it online. Embed webinar registration forms or links on web pages, blogs, or social media to reach your target audience.

Moderate Attendees

Stay in control: manage who attends your webinar. Approve, deny, or cancel registrations to filter the right audience. Prevent spammers and registrants who haven't met prerequisites, such as making a payment or completing a survey.

Present

Use video, screen sharing VoIP, and Phone audio with no downloads.

Record, Replay, And Share

Record your webinar using our webinar recording software and store it on the cloud. Replay the recording online, share it with those who missed your webinar, or download it for offline use.

Secure Audio And Video

Conduct video webinars to build trust and better convey your thoughts using the best webinar software. In Zoho Webinar's free webinar app, security is a priority that the audio and video feeds are encrypted using DTLS-SRTP encryption.

Use Phone Audio

If you have low internet access, you can dial in to webinars using our dial-in and toll-free numbers. With this feature, you and your attendees can join webinars from more than 100 countries.

No Downloads Required

Give your webinar attendees an easy, hassle-free experience. Let them join your webinar right from their browser without downloads.

Screen Sharing

Share your screen, an application window, or a connected monitor with your attendees using our live webinar platform to deliver presentations or collaborate on documents remotely.

ENGAGING WEBINARS

Launch polls, answer questions and Encourage attendees to speak.

Create And Launch Polls

Create polls before or during your webinar to get valuable insights from your audience. Conduct polls, view results instantly and share with attendees using the best webinar software.

Broadcast Messages And Hold Q&As

Send important texts and links to all attendees with Broadcast Message. Answer questions privately, or make them visible to all attendees using Q&A.

Allow Attendees To Speak

Let your webinar attendees speak their thoughts with the Allow to talk feature on our free webinar platform. Allow them to share their screen while they speak using Make Presenter feature.

Raise Hand

Let attendees use Raise hand to get the attention of the presenter just like in a physical classroom. Also, use it for conducting impromptu polls based on the presenter's discretion.

Get Your Audience To Act

Direct your attendees to your website, a thank-you page, feedback form, survey link, or any other URL at the end of your webinar. Set the URL while organizing your webinar using Post-Webinar Re-direction feature.

ANALYZE WEBINAR REPORTS AND FOLLOW UP

Export comprehensive webinar reports in XLS and CSV formats

Attendee And Registrant Report

Download a consolidated report of registrants and attendees with email addresses, time of registration, country, and participation status using our free webinar tool.

Polls And Q&A Report

Get valuable insights by looking at your poll numbers and the total percentages. Revisit the questions your attendees asked and the answers you provided.

Performance Report

View the overall impact of your webinar by looking at the number of people who registered, attended, participated in polls, and asked questions using our webinar application.

Follow-Up Emails

Pull email addresses from webinar reports to send thank-you emails to registrants and attendees, as well as share your webinar recording link with them.
